---

## Summary

---

Since I can remember, I always enjoyed technology from playing video game on my consoles to working on projects on my computer. When my high school introduced me to computer science I fell in love with programming and decided to pursue as a career. It took me a long time to get where I am due to where with lack of guidance and sought out full-stack software engineering as my ideal career.

## Experience

---

### Six Flags | Valencia, CA

#### Team Member | 02/2020 - 09/2021

- Operate cash register by compiling printed list, and display cost of customer purchase, tax, and rebates on monitor screen and issue receipt.
- Provide excellent customer service to all park guests.
- Quote price of items and services for which money is received.
- Check THE FLASH Pass to ensure guest-eligibility to ride an attraction at assigned ride station
- Collaborate with ride operations staff to ensure guests are loaded on ride in a timely manner.
- Promote THE FLASH Pass and provide system overview to guests in normal queues at rides or other designated areas of the park.

  - Computer Architecture and Assembly Language 122
  - Data Structures and Program Design 182
  - Discrete Structures 256

## Projects

---

### [Meme Overflow](#)

App Academy had us to start working on our first project to show off in our interviews and portfolio. It was to clone a website from a list of approved websites, in which we chose Stack Overflow to clone. Meme Overflow is a clone of StackOverflow, a website for users to ask questions, answer with memes, and comment on memes!
